

ASP.NET, C# programmer

S4Potential has a mission to create truly dynamic educational and therapeutic software designed to unlock human potential. The S4 approach is a new form of education based upon the principles of best practices in psychology, learning, and e-learning, delivered via an innovative and sophisticated interactive video format. Our growing list of products is already being used to change lives – in the clinic, the workplace, and beyond.

S4Potential is based in Almonte, just 20 minutes from Kanata. We offer a collegial, collaborative environment, stimulating work, and a full range of benefits.

Position & Responsibilities:

- Responsible for developing and maintaining a C#/ASP.NET web application.
- Develop, maintain, and support web services, database and other product infrastructure components.
- Implement product enhancements, and bug fixes.

Essential Skills:

- 2+ year's software development/programming experience on web applications using Visual Studio 2005.
- Strong C#/.NET development skills.
- Strong SQL and relational database design skills.
- Some experience using nHibernate.
- Some experience using Crystal Reports.
- Experience implementing n-tier web applications using an object-oriented approach.

Beneficial Skills:

- Experience developing multimedia content using Flash and ActionScript.

Desired Personal Attributes:

- Passionate about creating new technologies and user experiences
- Ability to working under pressure in a fast paced multi-project environment
- Works effectively in an agile, collaborative team of developers and designers
- Self-motivated, can also work independently without constant supervision
- Applies initiative and creativity when approaching challenges
- Able to communicate effectively within a development team and with clients
- High UNBELIEVABLE attention to detail and commitment to quality
- Welcomes being challenged and pushed professionally
- Takes active interest in the company
